Community Involvement
People and organizations are able to be truly innovative and this is where deep transformation occurs. Partners practice joint decision-making and actively learn from each other!

People and organizations may participate in many ways:

**Giving & Donations**
People and organizations may give or donate time, financial or in-kind resources to the program.

**Influencers**
People and organizations may support the goals and growth of Land-based Learning through their influence on the hearts, minds and actions of others.

**Cooperative Action**
People and organizations may deliver services or programs that support the goals.

**Coordinated Planning & Action**
People and organizations may get together to jointly plan a service or program, or undertake a joint project.

**Technical & Advisory**
People and organizations may offer knowledge, expertise or advice that helps the program reach its goals.

---

YOU ARE INVITED
to find out how you can help provide youth with the opportunity to experience Land-based Learning.

**Please join us at an Informational Lunch**
on Wednesday, February 12th 12:00-1:00 pm
at Living Sky School Division Central Office
509 Pioneer Avenue
North Battleford, SK

- Relationships and Partnerships
- Respect for the land
- Create or Grow Connections with the Land
- Curriculum Focus
- Self-Awareness
- Leadership Opportunities
- Growth Without Limits, Learning For All

2014 Land-based Learning Camp

Living & Learning Together with the Land, the Community Sky is Endless . . .

Camp Overview

Grade 9 classes at Cando Community School and Leoville Central School in Living Sky School Division have been invited to participate in a four day bicultural camp from May 26-29, 2014. The camp will follow a bicultural model and co-teaching model that utilizes culture, traditions, language and land-based resources as the foundation to meeting Grade 9 Saskatchewan learning outcomes for a student’s growth in the following areas: First Nation and Métis culture, local traditional language, academics, traditional values, community engagement, environmental awareness, and healthy body, mind and spirit.

A series of land-based learning opportunities will prepare students for Walking in Two Worlds through the collaborative integration of traditional skills, knowledge, language, values and culture within the current living and learning environment.

Walking in Two Worlds

Communities view Aboriginal Education as being a unique approach that illustrates their desire to be self-defining, to have their ways of life respected, and to teach their children in a manner that enhances awareness of being an Aboriginal person who is capable of participating fully in their community. Further, that education should recognize the importance of spirituality, the distinctive Aboriginal styles of thought, learning and communication, and a multi-purpose approach of education that promotes Aboriginal culture and traditions while learning through experience. Ultimately, Walking in Two Worlds can provide the skills and tools that are relevant to contributing successfully in our contemporary world.

Where We Are Going >>>

The land-based learning camps are structured with sustainability and building capacity always in the forefront of our thoughts and plans. From resource mentorship to certifications to camp construction, we are committed to building the knowledge, skills and behaviours of everyone because living and learning together with the land, the community sky is endless.
